

The functional color company®

ARALON® SSF-110

ARALON® SSF-110

in short:

- * ARALON® SSF-110 has lower purity compared to ARALON® SSF-100 .
- * Mixtures with iron oxide particles and waxes results in good product qualities for Non-Destructive testing applications.
- * No known hazards in the mentioned applications.
- * Excellent solvent resistance in water, Soap and Paraffin. Moderate resistance in alcohols, alkaline solutions and fatty formulations.
- * Moderate light fastness (3-4 on the BWL at 10 % in acrylic paint at 12 µm thickness).
- * High fluorescence under UV light

**Only for NON DESTRUCTIVE TESTING
CRACK DETECTION on Metall surfaces**

Identification

Chemical Type	Azomethine
Color Index N°	48052
Color Index name	Pigment Yellow 101
Shade	Bright yellow
Appearance	Brownish Yellow powder
Molecular formula	C ₂₂ H ₁₆ N ₂ O ₂
Molecular weight	340,12
Fluorescence max (10% in acrylic paint, 12 µm thickness)	530 nm

Registration

EINICS	219-210-0
CAS	2387-03-3
Regulatory Listing	EINECS (Europe), TSCA (USA), DSL (Canada), AICS (Australia), ECL (Korean Existing Chemicals List), PICCS (Philippines), ENCS (Japan)
REACH	PREREGISTERED

Packaging

**Package = Minimal
order**

1 box = 10 kg

Any given technical information is given on a purely informative basis. ARALON cannot give any warranty for a particular use.

The functional color company®

About ARALON:

Today, ARALON – The NEW supplier of daylight fluorescent and functional pigments. Development, manufacturing and marketing of pigments for the paints & coatings (ARACO products), plastics (ARAPLAST), aerosols (ARASOL), and printing inks (ARAPRINT) industries only commenced in 2013 at its greenfield construction in 56412 Heiligenroth, Germany, half-way between Cologne and Frankfurt. ARALON's strengths are apparent in three key areas:

- State-of-the-art encapsulation technology coupled with modern and efficient manufacturing assets and lean operations capable of delivering best-in-class fluorescent pigments at competitive cost.
- Unique fluorescent ARAPLAST-melting pigments permitting coloration of thin olefin based films in single and multilayer packaging.
- Next generation ARAGEN-chemistry enabling unprecedented light stability of formaldehyde-free fluorescent pigments without compromising other performance attributes.

ARALON wants to surprise with best-in-class products, innovations that matter and prices hard to ignore – TRY US!

ARALON, What is behind the name and the logo?

ARALON was created as a name for our company based on the ARA, which is kind of colorful parrot. The wonderful and bright colors of the parrot's feathers are the result of light refraction through nano-sized holes in the natural polymer structure of the parrot feathers. Depending on the hole size and the number of feather layers results in an unlimited number of bright and colorful shades of light, seen by our eyes as being the color of the feathers themselves.

This has, for our company, a relevance of many kinds. Initially the brightness and purity of the parrot's colors is similar, but often less when compared to the brightness and purity of our fluorescent colors. Further, the colors of the feathers were created in completely natural way, which is for our R&D development, an orientation for the future horizons of the company.
